RE: ELECTION/RESTRICTIONS

We elect to pursue Claims 2-19 and 31-41, drawn to collective procurement management. This response should NOT be considered an abandonment of the other submitted claims, or any matter covered by previous filings. In a timely fashion we will be filing appropriate divisional applications with respect Claims 20-22, drawn to a transaction management system providing variable authorization delegation levels between a buyer and seller, and Claims 23-30, drawn to seller driver auctions.
